

B-GF-40-1 Filling and Sealing Machine

The B•GF-40-1 filling sealing machine is also a kind of machine used to fill plastic soft tubes and PEX soft tubes. Besides, it can also seal and cut the end and print dates. It applies to many industries like daily chemical, pharmaceuticals, food and chemical industries.

It is a kind of PLC program-control machine that is universal and multifunctional. The sealed end is firm and good-looking. The filling nozzles in different specifications are provided for materials in different thickness.

Features:

1. This machine controlled by PLC is touch screen with multi-function.
2. The filling and sealing machine is positioned by top tube and has organic glass to dust cover.
3. The sealing end is good-looking and durable.
4. The B•GF-40-1 filling sealing equipment can be equipped with all kinds of filling head to meet the special filling nozzles

Technical Parameters:

Power supply	380(220) V/50Hz		
Air supply	0.6-0.8MPa		
Air consume	<0.5m ³ /min		
Filling volume	10-50ml	50-100ml	100-200ml
Volume precision	≤±5%	≤±3%	≤±2%
Productivity	30pcs/min		
Tube diameters	φ16-φ50mm		
Dimensions(L×W×H)	1600×1150×1500mm		
Weight(kg)	350kg
