

LINOFILL Series Automatic Liquid Filling Machine (Linear), Capping and Sealing Machine

The Linear Automatic Liquid Filling Machine and Rotary Sealing Units with cap feeding hopper are mounted on a single unit to reduce the time between filling and sealing operations. The machine has provision for fixing appropriate sizes of syringes to fill bottles of different capacities ranging from a volume of 10 ml to 1000 ml.

Salient Features

- Monoblock configuration with filler and capper
- No bottle – no fill arrangement
- No cap – no seal arrangement
- Machine designed to seal ROPP / Screw / CRC caps by changing the sealing head.
