

LDBK-140L Automatic Single Lane Stick Packing Machine With From Filling Making Bags Sealing Coding Function

Single Lane Stick Pack Machine With From Filling Making Bags Sealing Coding Function (LDBK-140L), it is machine can automatically pack some liquid, powder and granule materials, such as energy gels, cream, honey and paste materials in chemical, medical and food industry, and powder.

Features:

1. Siemens touch screen, one button to adjust speed, easy to operate;
2. Customized peristaltic pump for precise liquid metering;
3. Servo control reciprocating film pulling, ensures nice sealing without wrinkles;
4. Anti-leak line is added on the top seal to ensure perfect and firm sealing performance;
5. Rounded corner design, ensures the gorgeous curvature for the bag;

Specification:

Model	LDBK-140L
Dosing Method	A: Piston pump 1-30ml;
	B: Piston pump 2-42ml;
	C: Magnetic pump 3Liter/min (for pure liquid or oil product)
Hopper type	A: Single layer SS304 hopper;
	B: Double jacket SS304 hopper;
	C: Magnetic pump hose connection to raw liquid tank
Packing speed	20-45 bag/min (1200-2700bag/min)
Bag size range	L 40-150mm ; W 15-100mm
Bag Seal type	Stick /pillow
Cut type	A: Teeth cut;
	B: Straight cut
	C: Round cut
	D: Irregular cut (Stick Width within 40mm)
Film thickness	0.05-0.1mm
Film material	Laminated film such as paper/PE, aluminum/PE, PA/PE, PET/PE, filter paper
Drive method	Electricity + Pneumatic
Control style	PLC control system+English/Chinese screen (Or customized panel)
Power	1.8KW
Power supply	AC220V 1phase 50Hz/ AC380V 3phases 50Hz
Air consumption	0.4cbm/min 0.8Mpa
Dimension	750x710x1780 mm
