

HP-350TV Table Top Servo Flow Wrapper

The compact design of the HOPAK Desktop Servo Horizontal Packaging Machine makes it easy to move and saves space, perfect for crowded pre-sales packaging display shops. It features a pusher conveyor and can be equipped with a deoxidizer rod and automatic feeder for improved efficiency and longer shelf life. Servo control allows for smart operation, with options for No empty Pack function to save on materials or anti-misalignment function for product and machine protection.

Features

- Servo motor control for film reel, ensuring precise film alignment with photoelectric eye. (Servo for bottom sealing, bag length, and photo eye (cutting point) memory function)
- Compact design saves space.
- Machine size is less than 2 meters.
- Automatic shutdown feature in case of film depletion.
- 50 memory presets for quick product changeovers.
- Safety cover equipped with safety switch (warning stop), preventing accidental operation.
- Touch panel human-machine interface.
- Optional No empty bag function to save film material costs.
- Optional with automatic deoxidizer feeder.
