

## *Semi Automatic Small Penicillin Bottle Capping Machine*

Semi Automatic Small Penicillin Bottle Capping Machine is aluminum anti-theft capping equipment for high-grade plastic bottles and glass bottles. It is widely used in food industry, chemical industry, medical and pharmaceutical industry.

### **Features**

- \* Semi Automatic Bottle Stelvin Capping Machine is using a four-knife sealing method. We have the bearing installed in the anti-theft hob, which is improved base on the latest sealing machine head from Italy. It is an aluminum anti-theft capping equipment for high quality plastic bottles and glass bottles;
- \* The capping rollers is made of 440C stainless steel with hardness, rust proof and excellent sealing performance;
- \* Each capping head is equipped with multiple hardened steel rollers to form the shell precisely to the bottle finish, assuring a secure, leak proof, tamper evident package;
- \* It is widely used for oral liquid, wine, medicine, daily chemical, suitable for screw cap, stelvin closure, ropp cap sealing & capping.

### **Product parameter**

Function	Aluminum screw cap sealing, stevin bottle capping
Sealing Rollers	4 (2 first rollers/2 second rollers)
Sealing Speed	20-25 cans/min
Sealing Height	35-300 mm (adjustable)
Sealing Diameter	12-33 mm
Voltage	220V, 50/60Hz
Power	0.37KW
Weight	130KG
Dimension	620*420*1420 mm (L*W*H)
