

DZQ-800C Fully Automatic Meat Food Continuous Vacuum Packaging Machine

DZQ-800C Continuous Vacuum Machine is a vacuum packaging device used for food, pharmaceuticals, and other products.

Product Description

Advantage

- The Continuous Vacuum Packaging Machine Equipped with a 200m³ suction vacuum pump, ideal for continuous operation.
- Includes an automatic film cutting function to remove excess film.
- Conveyor belt system allows connection to the front-end production line.
- Features a PLC touch screen for more versatile settings.
- The industrial food vacuum packaging machine Constructed from stainless steel for durability.

Description

The Conveyor Vacuum Packaging Machine is a high-efficiency, continuous-operation food packaging device featuring a conveyor belt design that enables automated processes and significantly improves packaging efficiency. This machine quickly removes air from packaging bags, reducing oxygen exposure, preventing oxidation, and inhibiting bacterial growth, thereby extending the shelf life of food. It is particularly suited for medium to large-scale production environments and is widely used in food processing, catering supply chains, and industrial packaging. It is ideal for packaging frozen foods, cooked meals, dry goods, and various other food types.

Technical Parameters

Model	DZQ-800C
Voltage	3phase 220/380V 50-60Hz
Pump Power	6kw
Pump Capacity	200m ³ /h /Option
Sealing Length	800mm (x2)
Sealing Width	10mm
Cover Size	900x860x250mm
Dimension	2400x1240x1500mm
Weight	≈700kgs
Certification	CE ISO
