

BTB-400 Cellophane Wrapping Machine

This machine is widely applicable to the packaging of various single large box articles, such as the medicine, health products, foodstuff, daily cosmetics, stationery articles, and audiovisual products, or the collective blister pack of multi-piece box articles (with gold tear tape).

Performance Characteristics:

The work can be finished by a series of cams in the machine driving various floating links and parts. Human-machine interface is realized in terms of multifunctional digital-display frequency-conversion speed regulation, PLC programmed control technology, automatic box feeding and automatic counting and touch screen display, pneumatic film falling; the machine can be combined to use with other production line.

Main Technical Parameters:

Packing Material	BOPP film and gold tear tape
Packing Speed	25~40 packs/min
Packing Size	(L)300×(W)200×(H)100mm
Electric Supply & Power	220V 50Hz 5.5kw
Weight	800kg
Overall Dimensions	(L)2400×(W)1200×(H)1800mm
