

## ***Automatic Quantitative Filling and Packaging Machine Pillow Type Packaging JS-34P***

Pillow  
type packaging

### **Product Features:**

- Equipped with photo-cell device to ensure extremely accurate bag forming, sealing and cutting
- This model produces pillow type packaging
- Equipped with product counting device
- All components in direct contact with the product are made of stainless steel, conforming to sanitation standards
- Convenient adjustment of package size
- The entire procedure from weighing, bag forming, filling and sealing to cutting and packaging is fully automatically operated
- We can design machines in accordance with your request
- Machine can equip with vibration loading system for hard-flow packaging product as an optional device.
- PLC control + Pneumatic sealing provide excellent packaging performance.
  
- Applicable packing products: Granules, melon seeds, candy, sugar, peanuts, beans, tea.....etc.
- Applicable packing materials: PET+PE+Aluminum Foil+PE, OPP+PE, other laminated heat-sealable materials.
- Standard Equipment: 1 toolbox containing, 1 box wrench, 1 hexagonal wrench, 1 screwdriver. One set of Conveyor.
- Optional Equipment: Quantity warning device Date coder device. Product input conveyor.

**Specifications:**
