

## Big Volume Pillow Pack Vertical Packing Machine SL-420

### The scope of application:

The machine can be widely used in food, medicine, chemicals, hardware and other fields for automatic measuring, filling materials, bag forming, and sealing packaging.

### Main Features:

1. Automatically complete product measuring, feeding, filling, bag forming and data printing, sealing, bag cutting and product conveying.
2. PLC is combined with touch screen control system, easy operation, simple and intuitive interface.
3. Servo motor driven, double belt film pulling system is reliable and accuracy.
4. Used high end electrical and pneumatic components from overseas professional supplier.
5. It can matches with measuring cup, powder head, electronic weather, rotor pump and other filling devices to complete granule, powder and liquid material package.
6. It is suitable for various kinds of bags: pillow bag, angle, and angle bag, punch bag, link bag etc.
7. Machine main material is stainless steel and aluminum alloy.

### Technical parameters:

Model	SL-420
Maximum capacity (Ml)	1000
Bag length (mm)	80-300
Bag width (mm)	80-200
Film width (mm)	200-420
Production capacity (bag / min)	30-60
Power / power	220V/1Ph, 2.5Kw
