

Desktop Screw Capping Machine SBM-DCM6100

The desktop capping machine is suitable for the cap screwing of different shapes of bottles in the industries of foodstuff, pharmaceuticals, daily chemical, pesticide and cosmetics etc. Its four adjustable speed motors are used respectively for cap supplying, bottle clamping, delivering and cap screwing. It is characterized by high level of automation, outstanding stability, easy adjustment, no need of spare parts for replacing bottle types or caps, which can be done only by adjusting.

Simple adjustment can be applied to a variety of different sizes and materials of the bottle, do not need to change any parts.

The features of Semi-automatic Desktop Screw Capping Machine

1. Micro-computer control, digital display.
2. Electrically controlled movement, positioning device, easy operation.
3. Suitable for various locking caps with different shapes and specifications.
4. The capping speed and tightness can be adjusted for different caps.
5. Applicable to the capping of cosmetic, medical, chemical, drinks and many kinds of bottle caps, etc.

Technical Info

Model No.	SBM-DCM6100
Bottle Height	50-300mm
Power Supply	AC220V/50Hz
Power Consumption	60W
Air Source Pressure: 5-6kg/cm ²	5-6kg/cm ²
Cap Diameter	20-50mm
Twisting Force	5-20N.m
Percentage of Damage	0.1%
Production Capacity	600-1800 bottles/hour
Machine Dimension	(L)620*(W)560*(H)770mm
Machine Weight	35Kg
