

Vertical Paste, Liquid Packaging Machine MC5000B/MC7300B

Paste packaging machine applicable scope: medicine, food, daily chemical, agricultural chemical, hardware, building materials and other industries, also according to customer requirements to provide customized machine.

Technical features:

The machine is a servo rotor metering pump metering fluid filling, which is then entered into the packaging bag by the bag-making moulder to complete the quantitative bag packing process.

Working principle of the equipment:

Weight specifications one key switch, touch screen Settings, fully achieve man-machine dialogue.

Technical parameter:

Model	MC5000B	MC7300B
The bag size (mm)	(50~340)×(80~250)	(50~460)×(80~350)
Measurment Range (g)	100~2000	
Measurment Accuracy	0.5%	0.5%
Capacity (bag/min)	10~70	10~50
