

## *Auto Bottle Plugging Machine*

### **Machine Introduction**

1. This machine is mainly used for 100-5000ml of plastic bottle and glass bottle filling and capping.
  - Only takes 30 second to change a new bottle;
  - Produce faster with higher precision (55~65 bottles/min);
  - Stop automatically when reaching the production target, which save time and is more accurate than man counting.
2. The machine is suitable for infusion, syrup, oral liquid, perfume, electronic cigarette,
3. Machine with simple structure but complete function. As well as convenient maintenance and simple operation
4. Optional for requested Electrical configuration and dust cover

### **Characteristics**

1. The parts which contact liquid are SUS316L stainless steel and others are SUS304 stainless steel
2. Simple operation, feeding bottles, filling, feeding caps, capping and collecting bottle automatically
3. PLC control, No bottle no filling, no bottle no capping, with high accuracy (optional)
4. Magnetic torque screw capping, never in-gage, cap unscrewing torque adjustable. It does not hurt bottles and caps

5. The whole machine meet GMP requirement and passed CE certification

### Technical parameters

Applied bottle	100ml-5L
Production Capacity	55-65 bottles/minute
Filling type	Piston pump
Filling nozzle	2 high speed auto sensed nozzles
Plug/cap nozzle	2 nozzles
Measuring accuracy	±1%
Plugging rate	≥99%
Capping rate	≥98%
Air Source	0.3~04kfg/cm2
Power Supply	220/380V 50-60Hz
Power	2KW
Machine size	2410×1060×1800mm
Weight	350kg
