

Fully Automatic Sleeve Shrink Wrapper (ZBS-6040)

Fully automatic sleeve wrapper quickly and efficiency wraps products in seconds, sleeve wrappers are designed to wrap a wide variety of packs, either as individual packs, or as collations. Two rolls of film are sealed in the middle, creating a single curtain of film. As the pack travels into the film, the wrapper creates a “sleeve” around the pack. The heavy-duty sealing blade provides a unique strong seal to complete the “sleeve”. The pack then travels into the shrink tunnel and a reliable sealed pack is produced.

Technical Parameters:

Model	ZBS-6040 Shrink Tunnel	ZBS-6040 Cutting Machine
Voltage	380V 50/60HZ	220V 50/60HZ
Power	24KW	1.5KW
Capacity	0-10M/MIN	5-20PCS/MIN
Working Size	600x400MM	630MM
Air Pressure	0.6-0.8	0.6-0.8 MPA
Dimension	2900x850x1650MM	1569x2560x1960
Weight	550KGS	450KGS
