

JBGN-2 series Semi-Automatic Quantitative Filling Machine Double

The machine adopts piston type quantitative filling principle, pure pneumatic operation, use the big bucket cylinder filling ingredients into the bottle, filling volume is adjustable and equipped with a mechanical anti-drip device, there are foot start and automatic continuous irrigation loading modes.

Technical parameters:

1. Number of filling heads: 2
2. 1-5 liters filling volume
3. Filling speed: 100-200 bottles per head / hour
4. Filling accuracy: + -0.5%
5. Gas source: 5-7kg / cm²
