MT-50 Round Bottle Labeling Machine Belt

Functional features

1. Wide applicable scope, can meet 20-120 mm Diameter range of cylindrical considerate scale; Special bottle machine need to modify the order;
2. And labeling of high precision, the tag end local deviation plus or minus or less 0.5mm
3. With clever extrusion device, just leave work pieces, automatic labeling
4. Is adopted for adjustment, different artifacts label switching is simple
5. And adopt synchronous belt traction, mechanical stability is greatly increased
6. And desktop type design, compact structure, small, powerful
7. The adoption by anodic oxidation of aluminum alloy support and advanced computer white box, the beauty is generous
8. USES the advanced electric eye, the object, labels, high detection sensitivity
9. Add code printer can is it sticks to standard code, synchronization code speed according to the label

Technical parameters:

Voltage power voltage: AC220V Plus or minus10V 50Hz 120w
Labeling accuracy label accuracy: plus or minus 0.5mm
The efficiency of label speed: 25-50a/minutes 25-50pcs/min
The label roll diameter label roll inner diameter: ф75mm
Label roll maximum overall diameter max label roll out diameter: ф or less 250mm
Applicable objects products size: ф 20-120mm
The label width wide of label: 8-150mm, L15-200mm
Code rate: According to the label
The whole machine size: 650x450x450mm
The weight gross weight: 33 kg
