

FJ-2 Semi-Automatic Packing Machine

FJ-2 Automatic Quantification Bag Packaging Machine is in the bag packaging machine from home and abroad based on the advanced experience, optimize the latest Western technology, PLC programmable control, with advanced touch-screen human-machine interface system, is by far the better bag packaging equipment.

The machine design is reasonable, the appearance of new, standard stripe-shaped sealing, replacement of filler can be implemented in the machine powder, dual agent, can be used according to need four sides sealing three sides sealing and sealing of two different forms.

Performance advantages:

- ◆ Control system - with Mitsubishi PLC control system, filling dose of random tuning
- ◆ Interface - color screen user interface, human-machine interface is simple, safe and reliable
- ◆ Temperature Control - using digital visual form can be seen.
- ◆ Material Box Design - automatically detect, material full automatically stop feeding, automatic feeding material less. (On powder machine is supporting the other billing products)
- ◆ Filling conversion - a variety of filling heads can be replaced to meet the powder, granules, aqueous and viscous liquid filling
- ◆ Electrical components - are used internationally renowned brands, ensuring that equipment reliability and high accuracy.
- ◆ Mechanical parts - and the materials of high quality 316 stainless steel contact parts. Other machine parts are of high quality 304 stainless steel
- ◆ Product requirements - volume membrane bag molding. (Roll film for the customer-owned)
- ◆ Maintenance situations - the machine meet the GMP requirements, easy disassembly, cleaning maintenance.
- ◆ Design - made with olive-green glass door pull to maintain, convenient operation, beautiful

Technical parameters:

- ◆ Packing vessel: Aluminum foil bag, plastic bag, paper bag, wide-opening bottle
- ◆ Packing capacity: 5g~1000g
- ◆ Packing accuracy: $\pm 1\%$
- ◆ Packing speed: 15~50parcel/min
- ◆ Power supply: 220V/50Hz
- ◆ Power consumption: 1Kw
- ◆ Weight: 280Kg
- ◆ Dimension: 1000x650x1800mm
