

LP Series Rotary Auto Bottle Unscrambler

LP series rotary unscrambler is special designed as complete set for rinser/filler/capper monobloc and with the latest international technology. The bottles are transferee through neck guided air conveyor to the monobloc after unscrambling from the unscrambler with fast, high efficiency and sanitation, It is satisfied for high speed filling request, and also raise production efficiency of the whole line. The air conveyor can also be used for aseptic filling line after take some modification.

主要技术参数 Main Technical parameters				
型号	Model	LP-16	YLP-15	YLP-21
工位数	Work position	16	42	60
生产能力	production capacity (b/h)	6000-10000	15000-20000	20000-25000
气源压力	gas source pressure (MPa)	0.7		
用气量	gas consuming volume (m ³ /min)	0.5		
适用瓶型	suitable bottle type (mm)	350-1200ml Φ50-Φ90	350-1250ml H=150-290	350-1250ml H=150-290
主电机功率	main motor power (kw)	2.2	3.0	5.5
风机功率	kw fan power (kw)	2.2	2.2	2.2
主机外形尺寸	dimension (mm)	Φ2056×2150	Φ2150×2290	Φ2650×2400
整机重量	weight (kg)	3500	4200	5200
