

High Stability Shrink Sleeve Packaging Machine

Shrink sleeve packaging machine suit for pharmaceutical, food, stationery, cosmetics and other industries in the multiple rows of small bottles or more rows of square box. With automatic labeling machines.

Description:

- This shrink sleeve packaging machine adopts PLC control, use, Korea and other international famous brands of electrical components make the machine run more reliable and stable.
- The film packaging cost can be reduced
- Special transport structure, to avoid damaging the bottle
- Seal equipped with special protection devices, can effectively prevent accidental cutting packaging
- The world's leading cold cutting technology to reduce power consumption and ensure closure of all fast and firmly
- Unique hot air circulation system, energy saving and shrink more tightening, beautiful
- The special belt transmission structure and rectify completely.

Technical Parameters:

Sealing form	Sleeve type
Power supply	380V/50-60Hz/3phase can be customized
Max packing	320(L)x150(W)x200(H)mm
Highest speed	25 bags/min
Film type	PE heat shrink film
Max film	400mm(W)x280(OD)mm
Total power	9.5kw
Furnace size	1200mm(L), 450(W)x220(H)mm
Conveyor speed	Adjusted, 40m/min
Air pressure	≤ 0.5 MPa (5 bar)
PLC	SIEMENSE S7
Sealing system	Constant heat system, easy to change knife without smoking
User interface	Eview
Machine material	Stainless steal
Machine weight	600kg
