

## YGF-100YC Tube Filling and Sealing Machine

The plastic pipe filling and sealing machine is a new and high technology equipment which has been successfully developed and designed by introducing foreign advanced technology and combining with GMP requirements.

The machine uses intelligent digital temperature control system, filling accuracy error of  $\pm 1.5\%$ , strong sealing.

- 1) The frame is made of stainless steel, and the parts contacting with the material are all stainless steel and conform to the food standard.
- 2) The use of the pneumatic part simplifies the mechanical structure and reduces the trouble. The performance of the machine more stable and safe.
- 3) Automatic spiral quantitative high precision. Sealing temperature: adjustable. Ensure a good seal.
- 4) Pneumatic and the main components of the machine, the use of imported brands to ensure machine service life longer.

### Technical Parameters

Production Capacity	60-70 / Min
Filling Volume	2 -250ml
Hose Diameter	10-55 Mm
Hose Length	50-220 Mm
Working Pressure	0.6MPa
Filling Accuracy	$\leq \pm 0.5\%$
Sealing Heating Method	Within The Heating
Main Motor Power	1.5KW
Heat Sealing Power	3KW
Overall Dimensions	2270mm × 960mm × 2100mm
