

High Speed Automatic Shrink Wrapping Machine PM-350A

The packing machine is developed especially for mineral water, beverage, wine, beer, product and so on infusion medicine bottle combination packaging, with stable function, and the packed articles tight and orderliness. It can be handled as a single pushing machine when high speed demanded.

Features:

- Applying imported PLC procedure automatic control, stable performance, and accurate control.
- Enjoying full-automatic function of feeding, tube management, shrinkage, and cooling shape-fixing flow.
- Film transportation is adopted with sensor switch control, adjustable deliver film length, and can reduce wastage.
- Elector motor is adopted with imported transducer to control, realizing unlimited speed regulating.
- Advanced spiral wind circulating structure, three-layer insulation treatment, and energy conservation.
- Reinforced cooling shape-fixing channel to ensure packaging products shape quickly and convenient storage and transportation.

Technical Parameter:

Model	PM-350A
Equipment Overall Size	L12000×W1100×H2100mm
Size-Host Machine	3400×1250×2350mm
Size-Shrink Tunnel	4200×1100×1700mm
Size: Conveyor	5200×1300×950mm
Maximum Packages size:	L2400×W650×H450mm
Material of shrink film	PE
Thickness of shrink film	0.03-0.15mm
Temperature of shrink tunnel	160 - 260°
Production capacity	16-20 bags/minute
Equipment Power	30Kw
Actual Power Consumption	28Kw/Hour
Voltage	380V/50-60HZ
Weight	2500Kg
Air Pressure	0.6-0.8mpa
Working Noise	≤65db
Width of conveyor belt	541mm
Draught fan	1.1KW (3 sets); 60W (6sets)
