

Automatic Desiccant Inserting Machine

Used for coiling desiccant inserting machine, which machine is mechatronic equipment installed with devices of stopping operation in time of lacking bottles, starting working when bottles are in place.

Features

- With touch screen and PLC, easy to operate
- Avoid the materials jam
- High shear knife age, accurate and reliable, avoid breakage of the desiccant bags.
- No bottle will not fill.
- Self-diagnose errors and stop working to make alarm at errors.
- Positioning adopts pneumatic clamping mechanism to clamp bottles stably and accurately.

Parameters

Applicable	Type	round, oblate, square, flat square bottle
Capacity	Bottles/min	50-120
Power	W	500
Vacuum pump	Mpa	0.04
Voltage supply	V	220V/380V according to customers' requirement
Oversize of machine	Mm	1150*800*1900
Weight of machine	Kg	300
