

Double Head Sleeve Labeling Machine

The label tray of our Double Head Sleeve Labeling Machine is designed as a single sheet of paper, which is highly suitable for mounting labels. The microcomputer can run automatically without any adjustment. Just press a button, you can automatically detect, locate and replace the label. It is absolutely fast and effortless. Due to the high and reliable performance, it realizes the function to ensure that the cutting position is very precise.

The conveying process is stable, and the tension control ensures the accuracy of label cutting strength. The newly designed cutter of our label tray of our Double Head Sleeve Labeling Machine is driven by a servo motor with high speed, stable and accurate operation, smooth cutting and good shrinkage. With the aid of the synchronous label positioning mechanism, the accuracy of the incision positioning can reach ± 1 mm. And it can be used for water, beverage, food, daily necessities, pharmacy, etc.

Product specification:

Production Speed (b / hour)	30000-42000
Voltage (v)	220
Applicable bottle diameter range (mm)	$\Phi 38$ - $\Phi 120$
Applicable label length (mm)	30 ~ 220
Applicable label thickness (mm)	0.03 ~ 0.13
Dimensions (mm)	3200L*1200W*2000H
Weight (kg)	400
