

Universal Round Bottle Labeling Machine

- The labeling machine is suitable for round bottle labeling in daily chemical, beverage, pharmaceutical and other industries.
- The labeling head adopts the high-precision servo motor of the famous factory to control the bidding.
- The control system adopts Siemens PLC, with the name factory touch screen, Chinese and English bilingual operation interface.
- The machine is simple and compact, easy to operate and maintain.
- The universal type of bottle-discharging device, the bottle shape of any diameter does not need to be replaced, and it can be quickly adjusted.
- Chinese and English operation interface, random help system, operator training, advanced and friendly human-machine interface system, online help information, real human-computer interaction, easy to learn, and workers can operate with a little training.

Machine specification:

1. Speed: 45m/minute
2. Label width: 190mm (based on needs)
3. Label width: 30mm max container size 30-110mm
4. Paper roll inner diameter: $\Phi 76.2\text{mm}$
5. Paper roll outside diameter: $\Phi 350\text{mm}$
6. Machine size: 2000×1000×1400(mm)
7. Machine weight: 280KG
8. Power: 220V 50Hz 1500W
