

Plastic Bottle Screw Capping Machine

This plastic bottle screw capping machine has employed automatic cap feeding mode, electromagnetic oscillation for sorting caps, and constant torque for screwing caps. And its main components include conveying system, capping system and control system.

Features:

1. High automation, reliable performance, stable bottle feeding and sending, good cap feeding continuity, and stable capping.
2. Easy to operate and maintain.

Main Parameters:

Production Capacity	2500~3600 bottle/hour
	4200~7200 bottle/hour
Bottle Size	200ml-1000ml plastic bottle
Capping Rate	≥99%
Electric Supply	220V/50hz
Power	2kw
Size	2440×750×1600mm
