

## Liquid Paste Filling Machine YGF-YLQ

Liquid Paste Filling Machine is a volumetric piston filler, semi-automatic filling machine suitable for any kinds of liquid or low viscosity, the piston suck the material up, and then push it out in a certain quantity. We can adjust the sensor to adjust the route of the piston, to control the filling volume.

The liquid paste filling machine uses Actuator and ball valve, so it's also suitable for some viscous products, or suspending products.

### Application:

Semi-Automatic Liquid Paste Filling Machine is suitable for water, lotion, soup, liquid soap, milk, juice, soy milk, wine, soy sauce, vinegar, tea, oil, lubricant, pesticide, fertilizer, detergent and etc.

Liquid Paste bottling Filling Machine is widely used in food, beverage, chemical, lube oil industries. It's a good choice for the enterprise.
