

Automatic Equipment Double Side Labeling Machine ST-60B

This machine is suitable for flat bottle, oval bottle, square bottle or irregular container, attaching two labels at the same time, and can select Single or double-sided stickers.

* Core working principle: the sensor detects the product passing, returns the signal to the labeling control system, controls the motor in the appropriate position control system to send out the label and pastes in the product to be labeled to the correct position, the product flows through the labeling device, the label is covered with the product, label attaching action completed.

* Operating process: Put products (can be connected to the assembly line)—product---oriented (automatic equipment)—product delivery (automatic implementation of equipment)—labeling (equipment automatic implementation)—collection of labeled products.

Technical Parameters:

Model	ST-60B
Labeling Speed	20-180pcs/min
Labeling Accuracy	±1mm
Label Width	15mm≤width≤200mm
Label Height	10mm≤Height≤350mm
Size of Pasted item	Thickness:≥30mm Height:≤500mm
Diameter of paper roll	φ76mm
Diameter of the roll	Max350mm
Machine Size	L2400*W1500*H1500mm
Weight	350kg
Use of electricity	380/220V 50HZ 2300W
