

## *PLC Control 2 In 1 Liquid Filling and Capping Machine FC-4*

- This is a monoblock machine combines filling and capping, applicable for various bottles and liquids.
- PLC computer system and touch screen controlling, friendly machine human interface, Simple operation,
- convenient maintenance, it is an ideal packing machine for customers with small productivity required.
- The capping system bears the functions of automatic cap sorting and cap tightening.
- All parts which contact with filling products are made of qualified stainless steel, the surface has been
- polished well, nice appearance, friendly environment, comply with GMP standard.

### **Technical parameter:**

1. Power supply: AC 220V;50Hz
2. Power :1.5 Kw
3. Bottle diameter:  $\Phi$ 40mm -  $\Phi$ 100mm
4. Cap size:  $\Phi$ 20mm -  $\Phi$ 50mm
5. Production capacity:  $\leq$ 1200 bottles/ hour (take water as test)
6. Machine weight: 420 Kg
7. Machine dimension (L×W×H): 2500mm\*1000mm\*1800mm
