

## *JX-388F Full Automatic Powder Filling Machine*

The packaging machine is an automated equipment that automatically completes bag drawing, bag making, filling, metering, sealing, bag cutting, counting and coding during the packaging process.

### **Features:**

1. Even and accurate, high precision, easy to adjust
2. Accurate feeding, high precision, safe and non-drip
3. Accurate coding, clear printing
4. Perfect matching roll film, smooth drawing
5. Fine workmanship, clear lines, beautiful edges
6. High flexibility, beautiful cut, no deformation

### **Application:**

Powder Filling And Packaging Machine is suitable for pharmacy, food, household chemicals, plastic products and other special industry and other loose type and granule material. Such as seeds, Chinese Drugs, feeding stuff, medicinal granules, salt, sugar, soup blend, oat, tea, active carbon, washing powder, dryer, etc.

**Technical Parameter:**

<b>Host model</b>	<b>388</b>
Production capacity	30-80 bags/min
Measuring range	50-300ml
Bag size	L40-200, W30-150mm
Film width	320mm
Edge banding type	Back seal three sides seal four sides seal
Total power	1200W
N.W.	350KG
Voltage	220V380V/50Hz, 60Hz
Packaging Materials	Composite paper/polyethylene, polyester/ship foil/ethylene, nylon polyethylene, etc.
Dimensions	1000*800*1800mm
