

MGS Machine – Model TopSserter II™

The MGS Machine Model TopSserter II™ has a solid reputation for handling your outsserter applications. It will feed, glue, place and verify an outsert.

Features & Benefits:

- Designed to meet relevant cGMP guidelines, reducing cleanup and inspection;
- Standardized FAT and commissioning protocols included, helping to assist machinery and validation;
- Quick and easy changeover utilizing change parts and digital screw adjustments;
- Easy-to-load ergonomic magazine with outsert tray shelf (see options for extended capacities);
- The ability to incorporate most outsert identification devices: bar code scanners, vision and smart sensors;
- Easily installs over most conveyor lines;
- Included hot-melt adhesive system saves money over costly double-sided tape systems;
- Integrates with optional ECOM™ Extended Capacity Outsert Magazine.

Technical Parameters:

- Speeds up to 250 bottles per minute;
- Hot melt adhesive system with optional tabletop conveyor;
- Feeds flat or folded outserts from the magazine and places onto a bottle cap, carton or other flat surface;
- Conforms to ANSI safety and cGMP guidelines.
