

## *Machines for Spice Mixing V-200*

The mixing cylinder of V-type mixer is two asymmetrical cylinders, and the material is high quality stainless steel plate rolled round and tightly welded. The two ends of the cylinder are oval head, and the two heads are equipped with feeding ports, which is more conducive to the cleaning of the cylinder after the material is mixed. The inner and outer walls are polished and polished with smooth surface, no dead Angle, complete discharge, easy to clean and so on.

### **Technical Parameters:**

- Model No.: V-200
- Application: Powder, Medicine Processing, Chemicals Processing, Food Processing
- Max. loading volume: 120L
- Weight: 280kg
- Power: 1.1kw
- Dimension(L\*W\*H): 1910\*840\*1700mm
