

## *DCJ-160 Automatic Liquid Packing Machine*

### **Descriptions**

Suitable for automatic packaging machine liquid, semi fluid, such as miso soup, sauce, shampoo, drinks, soy sauce, Tomato sauce, chili sauce, yogurt and various liquid, paste packaging.

### **Main performance and structural characteristics**

- 1) Reasonable design, simple structure.
- 2) Controlled by single-chip computer, stepping motor, convenient and correct bag length setting.
- 3) Simple, fast speed regulation.
- 4) Automatic completion for bag-making, filling, counting, sealing and cutting
- 5) Text display screen operating, convenient adjustment, high automation.
- 6) Advance sensor digital control bag making system, stable, correct bottom film run, bag length can be directly set up at operating side.
- 7) Plate alignment by cursor, correct brand design can be achieved.
- 8) Metering screw stem or glass devices can be optional in this machine according to different materials.

Optional: ribbon coding machine, gas-filled device (air source supplied by users).

- Suitable for seasoning food, beverage, medicine, daily chemical industry such as liquid materials packaging.
- Packing materials: pet/plated al/PE, pet/PE, BOPP film, nylon composite film can heat sealing compound packing materials.
- Three-side/Four-side Sealing

## Technical Parameters

Packing speed	30-100bags/min
Bag-making size	(L)30-120(W)25-80mm
Filling range	10-50ml
Packing materials	OPP/ CPP PET/PE
Film width	50-160mm
Film thickness	0.04-0.07mm
Power supply	AC220V 50/60Hz 1.0kw
Machine dimensions	(L)650(W)700(H)1600mm
Machine weight	250kg
