

## *Fully Automatic Cosmetic And Food Cartoning Machine HT-60*

According to the latest demand of the market scientific research technicians of our company develop this kind of automatic box packing machine (HT-60). It is applicable for packing pharmaceutical aluminum plastic and other similar content such as vials, cosmetic and food etc. Wwith automatic folding, boxing and sealing. Also it is special for the particular packing style.

### **Main performance characteristics:**

- Imported full servo control, compared with traditional mechanical control models, lower energy consumption, more accurate positioning and longer service life.
- Touch screen control, user-friendly design, digital display, accurate adjustment of various parameters.
- Automatic detection of products and can be adjusted, fast and accurate.
- Simple operation and high efficiency.
- Using PLC control, servo controller, equipment failure rate is low, easy to adjust.
- Simplify mechanical design, high transmission precision, stable transmission, low equipment noise, less oil pollution, clean, clean and hygienic.

**Technical Parameter:**

Running Speed	20-60 Boxes/min
Size Range Of Cardboard Box	Min.85*37*40mm
	Max.180*60*65mm
Size Of Unfolded Leaflet	80-170*125-260mm
Size Of folded Leaflet	80-170*30-60mm
Quality Of Operation Manual	55-70g/m2
Quality Of Cardboard Box	300-350g
Total Power	3.5KWS
Power	3pjases 4lines 380V/50HZ
Machine Dimension	3100*4000*1800MM
Weight	1500KGS
