

NTF-100 tablet bottling machine bobbins

Product Details

Main advantages:

1. Using a programmable controller centralized control, stable equipment performance, reliable action.
2. The operation only 1 to 2 people, significantly saving labor and production sites, and accurate loading capacity.
3. Simple operation and maintenance, low energy consumption, in line with GMP requirements.

Plot:

Automatic bobbin bottle tablet bottle machine is suitable for large thin single loaded long row ordered bottle packaging, the device uses a programmable controller, optical fiber testing. Stable performance, reliable operation, fully automatic operation.

Technical Parameters:

- PACKING: 10-30 / bottle;
- Tablet diameter: 8-30mm
- Tablet thickness: 3mm-8mm
- Vials length: 80mm-180mm
- Yield: 40 bottles / min
- Size: 2300mm * 1600mm * 1680mm

Scope:

Effervescent tablets and bottled straight gland, cool designate sheet bobbin bottles and similar packaging of this loading and gland.
