NRX-4000 In-line Capping Machine

The NRX-4000 In-line Capping System is a breakthrough in machinery design. It is the first In-line capper to reach the 600 cap-per-minute speed, and has 18 patents approved by the US patent office. NRX-4000 comes equipped with our H-42 hopper/sorter or our HES bulk cap hopper/elevator/sorter depending on your needs. Also, new “gull wing” gripper design, touch screen controlled remote operator interface, 9’6” of conveyor, and adjustable “on the fly” air clutches are all standard.

Application: The NRX-4000 is a high speed In-line Capper that can handle caps ranging from 18-63mm.

Speed: The NRX-4000 is capable of speeds up to 600± per minute when used with HES-30 hopper/elevator/sorter.

Function: Built for a harsh environment, with the highest standards. Pre-programmed machine adjustments for easy and reliable changeover with the touch of a button.
