

Stand Pouch Automatic Vacuum Packing Machine BY-160V-M

This is an automatic vacuum packaging machine, which provides full automatic production of bag-metering-filling-vacuum-sealing, avoids direct contact between employees and materials, saves labor, optimizes production processes, and eliminates pollution. Improve production efficiency and reduce costs. It can be used for mustard sauerkraut, radish, mushroom, seaweed.

Feature

- The machine can pack different product which need vacuum.
- Speed can be adjusted by frequency conversion within the range.
- Hygienic construction, the product contact parts adopt 304 stainless steel.
- Easy to operate, using the PLC and touch screen control system.
- No pouch or pouch is not opened completely, no feeding, no sealing.
- Pouch can be reused which avoid wasting materials.
- Sealing temperature detection. If failure of heating pipe, it will alarm.

Technical Parameters:

- Model: BY-160V-M
- Filling Range: 100gm to 250gm
- Filling Accuracy: $\pm 1\%$
- Speed: 35-55 pcs/min
- Pouch material : Laminated film\PE\PP e
- Pouch type : Stand-up, spout, flat
- Pouch size: Width: 65-160mm Length: 100-240mm
- Weight (App): 2800 Kgs
- Voltage: 380V 3phase 50Hz/60Hz
- Total power: 2.5Kw
- Air required: 8CFM @ 6bar pressure
- Cooling Water: 3L/ Min (Must match Cooling machine)
