

## *Vertical Sealer Machine HS-900LW*

Vertical sealing machine with ink wheel has date function, can seal many kinds of plastic bags.

### **Advantages:**

1. This product is suitable for packaging and export of soil and livestock products, ammunition storage, and preservation of cultural relics, scientific research department, food, daily chemical industry, factory store, retail department and service industry for sealing plastic composite film bags. Is more ideal sealing equipment.
2. No matter big bag, small bag, long bag, short bag, can carry on the continuous straight line seal, and obtain the satisfactory result.
3. Suitable for sealing and packing of plastic bags, plastic film can be sealed by electronic constant temperature control and steeples speed control rotation. It can be fitted with the latest microcomputer control system of indentation printing device, and also equipped with counting function.

### **Technical parameters**

- Model: HS-900LW vertical ink wheel seal machine
- Voltage: 220 v/ 50hz
- Power: 600w
- Weight: 47kg
- Sealing width: 6-15mm
- Temperature control degree: 0-300C
- Sealing speed: 0-13m/min
- Printing Word number: 30pcs
- Conveying load: 5kg
- Dimension: 1030\*450\*390mm
