

## Granule Particle Filling Machine 4DC-2K

This machine is mainly suitable for quantitative packaging of granular, mixed granular powder, products. Such as: pesticides, fertilizers, medicine granules, premixes, snack foods, sugar cubes, seeds, peanuts, salt, monosodium glutamate, grains, hardware and other granular materials.

### Features

1. LCD touch screen, PLC control, easy operation.
2. High precision electronic scale weighing.
3. All stainless steel structure, easy to clean and corrosion resistant
4. Manual bagging, photoelectric induction cutting
5. Electromagnetic vibrator feeding, adjustable amplitude, fast speed and high precision
6. Automatic calibration after turning on the electronic scale
7. Weight tolerance alarm, weighing error can be automatically corrected
8. Vibrator amplitude voltage adjustable

### Technical Data

Model	AT-4DC-2K
Measuring range	30-2000 grams
Packing speed	50 bags/min
Packaging accuracy	±(0.2%-0.5%)
Power supply/power	AC220V/50Hz/0.5Kw
Dimensions	131×107×242(cm)
