

Anti-sticking Screw Feeding Multihead Weigher CBW-1A14(25)

Anti-sticking Screw Feeding Multihead Weigher is well known for its pointier chute, which make products drop faster, also with independent chutes, the products won't bump to each other.

Anti-sticking Screw Feeding Multihead Weigher not only great for its product specialties, but also in water-proof performance, because when the products are food products with a bit water, flesh or sticky-wet ones, it's much more important to make sure the water-proof and duct proof protection.

Anti-sticking Screw Feeding Multihead Weigher is able to weigh around 10 gr and also more than 2 kilo, it uses HBM load cell from Germany, it provides the excellent precision for every products.

Features

- ◆ New actuator design reduces the mechanical vibration and improves the accuracy of load cell.
- ◆ Each drive board is independent, can be changed freely, even in different weighers.
- ◆ Friendly HMI, similar with mobile phone operation icons, make operation more easily and simple.
- ◆ Weighers with strong self-checking function, can realize the closed loop testing, real-time detect abnormalities in each node, and real-time display in human-machine interface.
- ◆ The software versatility, strong compatibility, different weighers using the same control system.

Technical Specification

Model	CBW-1A14(25)
Single Weighing range	10-2000 g
Avg. Accuracy	0.5~2 g
Max.speed wpm	70 wpm
Control panel	7 inch color touch screen
Hoppers Volume	2.5L (double-door), dimple plate
Construction material	304 Stainless Steel
Driving system	Step Motor
Control system	Modular control system
Power requirement	AC 220V/110V ±10% 50Hz(60Hz)1KW
Options	plain plate/timing hopper/printer/rotary top cone/multi-mouth top cone/reject device/9.7" touch screen
Packaging dimension (mm)	L1925*W1420*H1330mm
Gross weight	540kg
