

Secondary Packaging (Cartoning) CSC-50

The cartoning equipment applies the vertical semi-automatic production operation. The equipment is suitable for more types with medium capacity products

It is widely applied for every product with cartoning procedure.

For those carton dimensions within machine applicable range, the correspondent mold and minor tuning is necessary for the different products.

Technical data

Model	CSC-50 Semi-automatic Cartoning machine (Vertical Type)
Working Capacity	20-60 carton/min (Based on operator's speed)
Carton size range (WxDxH)	20-80 x 20-80 x 60-200 (mm)
Power Consumption	220V single phase, 50/60HZ
Air Consumption	90L/min @ 6 Bars
Machine Dimensions (LxWxH)	1480x900x1295 (mm)
Machine Weight	350KGS
