

## *ST-TMP-80 Rotary Jam Glass Jar Filling Packaging Line*

Rotary jam glass jar filling packaging line is my company to meet market demand, the introduction of foreign advanced technology to develop new products, adopt volumetric piston pump execution of high precision for content filling, and long service life, high temperature resistant, acid and alkali resistant, the machine set machine, electricity, gas integration, suitable for tomato sauce, peanut butter, salad dressing, seafood sauce etc., the different viscosity materials with bottle-washing filling, tunnel sterilization oven, capping machines, labeling machines etc. equipment composition production lines, conforming to GMP requirements.

### **Features:**

1. The all touching material is 304 stainless steel, completely correspond GMP standard.
2. Fast connection, simple, speedy unpicking and washing.
3. It's easy to adjust the filling volume and speed. We could change the parts according to the difference size and shape of the bottle, it is easy to adjust.
4. The machine sets: have bottle automatic filling, no bottle no filling.
5. The filling headsets drip proof equipment, the filling has not hairline and leak through
6. The filling head could effectively avoid the filling material to foam and spill, thus improve the filling speed.

**Technical Parameters:**

<b>Model</b>	<b>ST-TMP-80</b>
Filling heads	16
Capping heads	8
Filling volume	50-500(ml)
Capacity	4000-6000(bottles/hour)
Applicable viscosity	≤5000 (cps)
Voltage	380V/50HZ
Air pressure	0.6-0.8Mpa
Power	5.5kw
Dimension	2200X2100X2050mm
Machine dimension	2200×1200×2300 (mm)
