

Carbonated Beverage Filling Machine GXGF

This automatic filling machine is specially designed for filling gas drinks. By adjusting the filling time with the touch screen, it can fill all the bottles in one filling machine with fast speed and high precision. All parts in contact with materials are made of food grade stainless steel.

Technical parameter:

Product use:	gas beverage filling
The working principle:	of pressure
Size:	2360*1770*2700
Material type:	liquid
Size:	2360*1770*2700
Filling volume:	500-1000 ml
Suitable bottle size:	mm
Filling accuracy:	0.5%
Packing:	bottle
Applicable objects:	carbonated drinks
Applicable industry:	Food
Power:	2.5kW
Filling head number:	10
Bottle height:	mm
Production capacity (cans per minute):	3000
