

XP1-20 Bottle Washing Machine

XP1-20 Bottle Washing Machine is used in ampoule bottle, oral liquid bottle and plastic bottle for recoil pressure cleaning, high-speed centrifugal drying machine is a joint full, the original bottle washing machine cleaning is completed and then through the rejection of the two water machine drying process improvements for the process, reducing equipment investment links secondary pollution, meet the GMP requirements. And reduced investment in equipment and staff input is more advanced clean equipment.

The bottle is loaded into the machine with plate rotating frame 4-position, close the door and start the drive will automatically control the motor running slowly, the pump starts to clean, rinse 90 seconds (adjustable) after the pump stops automatically run at high speed, bottle of water and impurities bottle thrown reach the goal of washing dry.

Technical Parameters:

Model	XP1-20
Bottle Size	1-20 ml
Production Capacity	15,000 bottles/h
Aluminium Frame Size	360*275*600 mm
Tumble Speed	10-520 rpm
Flushing Pressure	0.2-0.3 Mpa
Rinse Water Speed	2-3.6 m/s
Power	380V, 50Hz, 0.75Kw
Packing Size	1000*800*1190 mm
Packing Weight	180 kg
