

Vertical Snack Packing Machine HTL-V420

The bagging machine is widely used for packing of products in shape of granules, stripes, slices such as candy, potato chips, jelly, and peanuts.

Main technical:

1. Colorful touch screen with stable transmitting PLC control to perform bag making, weighing, filling, sealing, code printing, and cutting automatically.
2. Independent compressed air control and electrical wire system control separately, low noise in running, stable performance.
3. Vacuum belt pulling system to feed film and make bags with no faults.
4. Double servo control system, precise positioning.
5. Easy to place the rewind rolls onto the machine
6. Set up and adjust parameters on touch screen to change bag size
7. Sealed structure design to prevent dust contamination
8. Multi computerized weighing heads to deliver correct weight.

Technical Parameters:

Model	HTL-V420
Bag length	80-300mm(L)
Bag width	50-200mm(W)
Film width	420mm
Packaging speed	5-60bags/min
Measurement range	150-1200ml
Barometric pressure	0.65mpa
Consumption	0.3m ³ /min
Voltage	220V
Power	2.2KW
Dimensions(L*W*H)	1080mmx1300mmx1400mm
Weight	540Kg
