

SPZ-600B automatic thermal shrink packaging machine

Application scope:

Pharmaceutical, food, stationery, cosmetics and other industries in the multiple rows of small bottles or more rows of square box. With automatic labeling machines.

Feature:

- It adopts PLC control and other international famous brands electrical components, make the machine run more reliable and stable.
- Reduces the packing cost by shrink film packing machine.
- Special transport structure to avoid damaging bottles
- Sealing equipped with special protection devices; it can effectively prevent accidental cutting packaging.
- The world's leading cold cutting technology to reduce power consumption and ensure sealing fast and firmly
- Unique hot air circulation system, energy saving and shrink more tighten, beautiful.
- The special belt transmission structure can rectify skewing completely.

Main Technical Parameters:

Model	SPZ-600B
Packing type	Cuff type thermal shrink packing machine
Max packing size	320(L)x150(W)x200(H)mm
Max packing speed	25packs per min
Film type	PE
Max film	400(W)X280(outer diameter)mm
Furnace size	1200(L), furnace mouth 450(W)x220(H)mm
Convey speed	40m/min, adjustable
Air pressure	≤0.5Mpa
PLC	SIEMENS S7
Sealing systems	Constant heating system, easy to replace cutter, sealing smokeless and odorless
User interface	Eview
Power consumption	9.5Kw
Dimension size	2900(L)x600(W)x1600(H)mm
Total weight	600kg
