DT-450 Non-tray Automatic Packaging Machine

DT-450 Non-tray Automatic Packaging Machine is suitable for plate-shaped regular objects packing like biscuits and wafer foods.

Features

1. The machine is simple in operation, reliable in quality and stable in performance.
2. Frequency control, variable speed, photoelectric detection, two-way tracking, can effectively eliminate packaging errors.
3. The entire machine's control is centralized by the PLC, reducing the point of failure.
4. This machine is equipped with a positioning and parking function, which can effectively prevent hot film when parking.
5. The use of reverse tracking improves the tracking accuracy, ensures cutting accuracy, and avoids the waste of packaging materials.
6. Save trays, reduce pollution, and save costs.

Main Parameter

Model	DT-450
Film width	Max.450mm
Bag making size	Length: 80-240mm; Width: 35-70mm
Product height	35-70mm
Roll film diameter	Max.320mm
Packing speed	30-80bags/min.
Power specification	220V,50/60HZ,3KVA
Machine size	(L) 5000× (W) 960× (H) 1750mm
Machine weight	1300Kg
