

Back Sealing Pillow Packing Machine JY-250

Horizontal flow wrap machine is ideal for suppliers of products that must be packaged individually. Flow wrapping is a horizontal packaging process in which product enters the machinery and is wrapped in clear or printed film. The result is a tightly fitted flexible package with a horizontal back seal and end seal.

Feature:

1. Dual inverters control, bag length can be set and cut in one step, saving time and bags.
2. Temperature independent PID control, more suitable for packaging different materials.
3. Self failure diagnosis, clear failure display; positioned stop function, without knife sticking and film wasting.
4. Using double encoder enables stable performance.
5. Strengthened blade holder makes compact sealing
6. Optional air filling device achieves broad application.
7. Selected code system achieves credible Packaging.
8. Simple and automatic packaging achieves high speed and saving labor.
9. Optional material-cutting proof device, guarantee for using.
10. Multipurpose packaging, suitable for various packaging to similar type of product.

Parameter:

Model	250E/S	250B/D
Film width	Max.180mm	Max.250mm
Bag length	50-115mm or 45-90mm	65-190mm/90-280mm 90-220mm/120-330mm
Bag width	30-80mm	30-110mm
Product's height	Max.35mm	Max.45mm
Packing speed	60-330bags/min	40-230bags/min
Power	220V 50/60HZ 2.4KW	220V 50/60HZ 2.4KW
Machine dimension	3770x670x1450	3770x670x1450
Machine weight	500kg	500kg
