

## GSZ-1 Filling-Stoppering Machine

Suitable for filling and stoppering of glasses and plastic bottles from 30ml to 500ml.

It adopts the linear-type filling principle to ensure the filling accuracy whilst the mechanic stoppering mechanism will ensure the operating stability. In addition, the machine is featured by easy maintenance and can be connected with other machines into one compact producing line.

### Technical Parameters:

Production capacity(pcs/min)	40-60
Filling accuracy(%)	± 2.5
Number of stoppers	Singlehead
Rate of stoppering(%)	≥ 98.0 (depend on the best stopper features)
Power supply	220V 50Hz
Power(kw)	44044
Weight(kg)	600
Overall dimensions(L × W × H)(mm)	2,400 × 1,270 × 1,600
