

Servo screw filling sealing detergent powder packing machine KF02-PD V620

Usage:

This machine is mainly used for packing all different liquid, paste, powder , granule products: such as sauce, water, honey, milk powder, spices, sugar, salt, coffee beans, rice, beans, peanuts, sunflower seeds, grains, cereals, nuts, chocolate beans, potato chips, frozen dumplings, cereal, tea, washing powder, desiccants etc.....just match with different filling weighing system : piston pump , auger filler, multi heads weigher .

Function and features:

- This machine can automatically complete following work: material lifting--auger filling measuring--coding--bag making--filling--gas injection / exhaust (optional)--sealing--counting-- conveying finished products--sorting finished products.
- Imported PLC servo and pneumatic control system and super touch screen to form the drive control center; high reliability and the intellectualized degree, and equipped with safety protection.
- Touch screen can store a variety of different product packaging process parameters, when replacement product can be used at any time without having to reset.

- Equipped with fault display system, when the fault occurs, be clear at a glance, in order to promptly eliminate.
- Can make hole punching device after customer's request.
- All the contact materials parts are stainless steel 304.

Technical Parameters:

Model	KF02-PD V620
Bag sealing type	Back seal bag,Gusseted bag.Quad seal bag
Packing Speed	10-50bags/min (according actual materials and filling volume)
Package Bag size	L 80-400mm; W 50-300mm
Packing Volume	500-5000g/bag
Control Style	PLC system+ English operation screen
Power	3.5Kw,3phase 4 wire , 380/220V, 50/60Hz
Film width	620mm
Air consumption	0.8Mpa 0.3m ³ /min
Appearance	Stainless steel 304
Weight	G.W700Kg
Dimension	L1320×W950×H3000mm
Film material	PET/PE,PE/BOPP,BOPP/PP
