

## ZX-F-01A Semi-Automatic Quantitative Powder Filling Machine

### Features

- Can be cleaned at any time, at will, without dead Angle, within 10 minutes
- It is convenient to adjust the position of the agitator to achieve the best packing precision
- The agitator, measuring screw, long shaft and other components can be easily maintained high precision processing means make motor, long shaft, bin, measuring screw, cup and so on to achieve a high degree of concentric.

**Technical Parameters:**

Packing specification	2g-5kg
Packaging speed	1200-3500 bags/hour
Packaging Accuracy	$\leq \pm 1\%$
Voltage	AC380V (or 220V)
Power	1.5Kw
Machine weight	180kg
Machine size	710*810*1900 (mm)
