

## *GT6T-500 Automatic Hand Sanitizer Gel Filling Machine*

Automatic hand sanitizer filling line including hand sanitizer bottle filler, capper, induction sealer, etc. It can fill different shapes of bottles also we offer specially attachment gives you the options to bottles & shapes, including rounds, wide mouths, narrow mouth, cosmos, cylinders, oval, oblong and plastic jug. Plastic bottle materials include PET, LDPE, HDPE and PVC filling machine, capping, and labeling machine.

Cakey technology machine offers a selection of high-quality hand sanitizer capping machines to ensure secure products. This component is essential to guarantee that the product is prepped for the end-consumer.

### **Features:**

- PLC computer control piston operation, with photoelectric conversion and pneumatic action of high-tech filling equipment.
- The whole machine frame, shell, moving parts, etc., are made of stainless steel, quality assurance.
- The whole machine is designed and manufactured according to GMP specification.
- It is suitable for packing all kinds of sticky materials such as washing liquid, hand sanitizer, shower gel and daily chemical product.

## Technical Data

<b>Model</b>	<b>GT6T-500</b>
Filling Method	Filling from the bottom, lifting while filling
Voltage	220V 50Hz Single phase
Air Supply	0.5-0.7Mpa
	(Air compressor needs customer configuration)
Machine Material	Food contact 304 stainless steel
	Rack section 201 stainless steel
Filling Range	(20-100ml) (30-300ml) (50-500ml) (100-1000ml)
	You can choose a suitable range according to your filling volume
Filling Pipes	6
Filling Speed	1500-2100
(Depend on material and filling quantity)	Bottles per hour
Size(L*W* H)	2500*1050*1900 mm
Weight	500kg
